

Everhot 60 in Sage

EVERHOT | 60

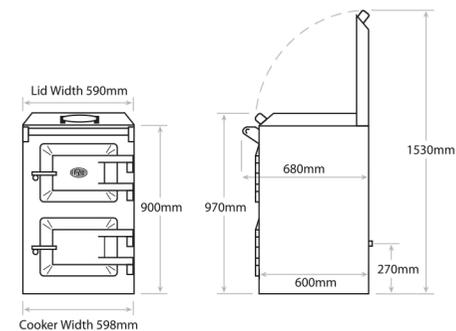

Town or country, this is the perfect choice for the smaller kitchen since the 600mm width will fit a standard 600mm wide cooker space.

Installation is incredibly straightforward since neither flue nor re-enforced floor is needed and it simply plugs into a 13 amp socket, keeping any disruption to a minimum.

The Everhot 60 has a stainless steel digital control box which is typically positioned in an adjacent cupboard.
